

Virtual Inspection and Evaluation of Weathering (VIEW)

Atlas Weathering Services Group (AWSG) welcomes visitors to any of our weathering laboratories to meet our staff, enjoy the weather, and personally inspect samples that you have on exposure. With rising travel costs and busy schedules, the ability to spend the time and expense to visit has become challenging.

Using mobile, hands-free, camera-equipped glasses and a secure video conferencing software application, AWSG can now be your “eyes at the site” by offering our Virtual Inspection and Evaluation of Weathering, or VIEW service.

The hands-free glasses allow the user to point to specific areas of interest

The digital microscope (up to 60x) can be used to magnify specific degradation modes

Features

- In field/in situ VIEW assessments
- Live online meetings or recorded video/audio
- 1-on-1 meetings or conferencing with multiple locations
- Meetings can be scheduled at routine intervals or by request
- Screen capture and “whiteboard” features to note specific areas of interest
- Digital microscope can magnify any specific surface defect

The service is available at both our Phoenix, Arizona and Miami, Florida outdoor facilities, as well as the accelerated laboratory in Mount Prospect, Illinois.
